8. There are five _____ (glass) of water on the table.
9. My mother often _____ (watch) me play in the park.
10. The sun shines _____ (bright).

三、阅读理解(12 分)

(A)

Swimming is a very popular game in the world. Many people like swimming in summer, and in the other three seasons too. They think water makes them feel cool and swimming makes them keep healthy. But sometimes it's also not safe if you don't know how to keep safe when swimming.

If you swim in a wrong place, it may not be safe. A lot of people die (死) when they are enjoying themselves in the water, and most of them are students. Now some people are not careful in swimming. They often think they can swim very well, so nothing will happen to them in water.

If you go swimming in summer, remembering the following rules will be very useful. Don't get into water when you are by yourself. If there is a "No swimming" sign, don't get into water. If you remember these, swimming will be safe and enjoyable.

1. _____ like swimming in summer.
A. Few people B. Lots of people
C. Only student D. Only swimmers
2. Swimming can make people keep _____ according to the passage.
A. clean B. fat C. healthy D. thin
3. It's not safe to _____ in wrong place.

- A. sing B. play C. swim D. dance

4. The sign "No swimming" means _____.

- A. get into water B. don't get into water
C. don't play into water D. play into water

(B)

The sun is always shining. But it can only shine on one side of the earth at one time. When the sun is shining on one side of the earth, it is night on the other side.

At night, you can see the stars (星星). The stars are in the sky all day. But the light from the sun is so bright that you can't see them. When night comes, there is no light, and the stars are bright enough to see.

The stars look very small. But some of them are even bigger than the sun. They look small because they are so far away from you. Big things look much smaller when they are far away. The sun is closer (近) to the earth than other stars, so it looks bigger.

1. When it is night, the sun _____.

- A. doesn't shine
B. shines for a short time
C. disappears (消失)
D. shines on the other side of the earth

2. We can't see the stars in the sky at daytime (白天) because _____.

- A. there are no stars there
B. the stars are much smaller than the sun
C. the bright light from the sun makes them not seen (被看见)
D. the stars come out only at night

3. The stars look small because _____.

- A. they are far away B. they are small
C. they have no light D. they are in the sky

4. Small things may look _____ when they are close.

- A. bigger B. small C. near D. far away
